

Didcot A Power Station (N Gauge)

Exhibition Managers Notes

Didcot A is an N gauge layout representing the rail served Didcot coal and gas power stations circa 2008. The inner loops carry regular merry-go-round coal and oil trains to the power stations, whilst a constant stream of passenger and freight trains pass in front on the four-track Western mainline. A viewer highlight is the regular smoke whisps and puffs from the cooling towers and 600ft stack!

Layout Details:

Transport	1x SWB Transit Van (£104) + fuel 25p/mile 1x Car + fuel 15p/mile
Set Up	Friday night
Operators	4
Accommodation	For 4 operators, if journey time over 1 hour
